1.3.1 Education: the Key to Engagement, Empowerment and Evidence-Based Decision-Making

If we don’t know, then we aren’t part of the solution. We should never underestimate human capacity, however, we all need to be mobilised into action, to be made aware of how we can make a difference in our lives and the lives of others.

This session will identify key areas for investing in knowledge and key stakeholders to disseminate to.

Target 1.3.1: By 2015 develop ten modular education programmes, based on harmonized communication strategies, that foster a better understanding of linkages between water, sanitation, hygiene, food security and health to consumers, practitioners, policy/decision-makers and health promoters, and to deliver these programmes in 30 countries by 2018.
