POOPONOMICS
SANITATION EXAMINATION

2.5 BILLION
lack access to basic sanitation

1 BILLION
still practice open defecation

THAT’S 15% OF THE WORLD

EXPOSURE TO HUMAN Faeces CAUSES DISEASES

DIARRHOEA

CHOLERA

INTESTINAL WORMS

TRACHOMA

Unsafe water, poor sanitation and inadequate hygiene causes diarrhoeal diseases that claim the lives of 600,000+ children < 5 age /year

2,000,000,000 intestinal worm infections, (1/3 of the world’s population) & 200,000,000 schistosomiasis infections

750 days left
to reach the MDG target of reducing by 1/2 the number of people who lack access to basic sanitation around the world

FUNDAMENTALS OF SANITATION

Sanitation brings dignity, equality and safety

Sanitation is a good economic investment

Sanitation is a human right

Sanitation is vital for good health

Sanitation sustains clean environments
