39. In your opinion, what do you think are some of the preconceived perceptions your community has about the use of biogas from human waste by-products for lighting?

40. In your opinion, what do you think are some of the preconceived perceptions your community has about the use of biogas from human waste by-products for cooking?

41. Would you promote the use of the human waste by-products (Biogas, sludge pellets) as a source of domestic fuel in your community if it proved to be (choose all that apply):

- Cheaper than your current source of energy
- More efficient than the currently popular energy sources
- Better for trees, the environment in general, sustainable
- Meant improved sanitation facilities for your community
- Safe and not harmful to health
- Easy to use and time efficient
- The norm/popular
- Provided an income source to improve water and sanitation access for your community

If not, why not?

42. What information would you need to change your mind?

43. Would you support the introduction of community anaerobic digestion toilet facilities?

- Yes
- No

If not, why not?

CONCLUSION

Thank you so much for your time and contributions. This is the end of our questions, but we would still welcome any additional comments, ideas, or concerns that you have. Is there anything we forgot or anything you would like to add?
